

SYSTEMS, METHODS AND COMPUTER PROGRAM PRODUCTS FOR UTILIZING AN INFORMATION EXCHANGE FRAMEWORK

5

ABSTRACT

10

Systems, methods and computer program products for utilizing an information exchange framework are disclosed. In a first embodiment, a memo may be exchanged between invitees to a meeting utilizing the information exchange framework. In a second embodiment, security information may be exchanged between a shopper and a store utilizing the information exchange framework. In a third embodiment, the information exchange framework may be utilized as a forwarding intermediary during the exchange of email communications between parties.
